Summary	Possible Root Cause
Budget filter shows properties outside selected range	Budget filter query not applied correctly in backend/API
Property condition filter displays mixed results	Incorrect filter mapping between UI and database
Property type filter not applied correctly	Property type filter logic is incorrect
Area filter displays properties outside selected range	Area range validation missing or incorrect
Facing filter displays mixed facing directions	Facing filter condition not enforced correctly
With Photos filter shows properties without photos	Image availability check missing
Hot Deals filter displays regular properties	Hot Deal flag not applied in search query
Verified Only filter hidden on large screen	Responsive CSS/UI issue
Sort By functionality not working correctly	Sorting logic not applied correctly
Owner contact information not displayed	Contact information not fetched from API/database
Call functionality unavailable due to missing phone number	Phone number not loaded on property details page
Bookmark/Favorite option missing	Feature hidden, removed, or not implemented
Unable to share newly posted property link	Share URL generation missing
Guest user can access Post Property section	Authentication check missing
Bookmarked properties do not appear in Bookmarks/Favorites section	Bookmark data is not being saved properly or Favorites API is not returning bookmarked properties.
Posted property link cannot be shared/opened by another user	Share URL generation or deep-link configuration issue.

Recommended Fix	Severity
Apply Min-Max budget validation and return only properties within selected range	High
Ensure selected property condition is passed correctly and filtered at database level	High
Validate property type values and apply correct filtering before displaying results	High
Apply proper Min-Max area validation in search query	High
Restrict results to only the selected facing direction	Medium
Display only properties containing valid image records when filter is enabled	Medium
Filter results based on Hot Deal status only	Medium
Fix media queries and ensure filter visibility across all screen sizes	Medium
Implement proper sorting based on selected criteria (Price, Date, Relevance)	High
Retrieve and display owner contact details correctly on property page	High
Load phone number correctly and enable click-to-call functionality	High
Add Bookmark/Favorite functionality and store saved properties in user profile	Medium
Generate unique property URL and enable sharing options	Medium
Restrict Post Property access to logged-in users and redirect guests to Login page	Medium
Verify bookmark save API and Favorites retrieval functionality.	High
Generate valid public URLs and verify deep-link functionality.	Medium
